Questionnaire Automation

Evidence supports every proposed answer

Core capabilities

The main activities and the information they connect.

Questionnaire intake and parsing

Structure incoming questions for assignment.

Source citations

Connect each response to supporting material.

AI-assisted draft answers

Use permitted controls and evidence to prepare answers.

Reviewer routing and approval

Require the designated owner to review the answer.

From daily work to oversight

Supporting functions keep decisions and evidence current.

Versioned answer bank

Reuse approved language with its version context.

Edit and approval history

Retain how the response changed and who approved it.

Exception tracking

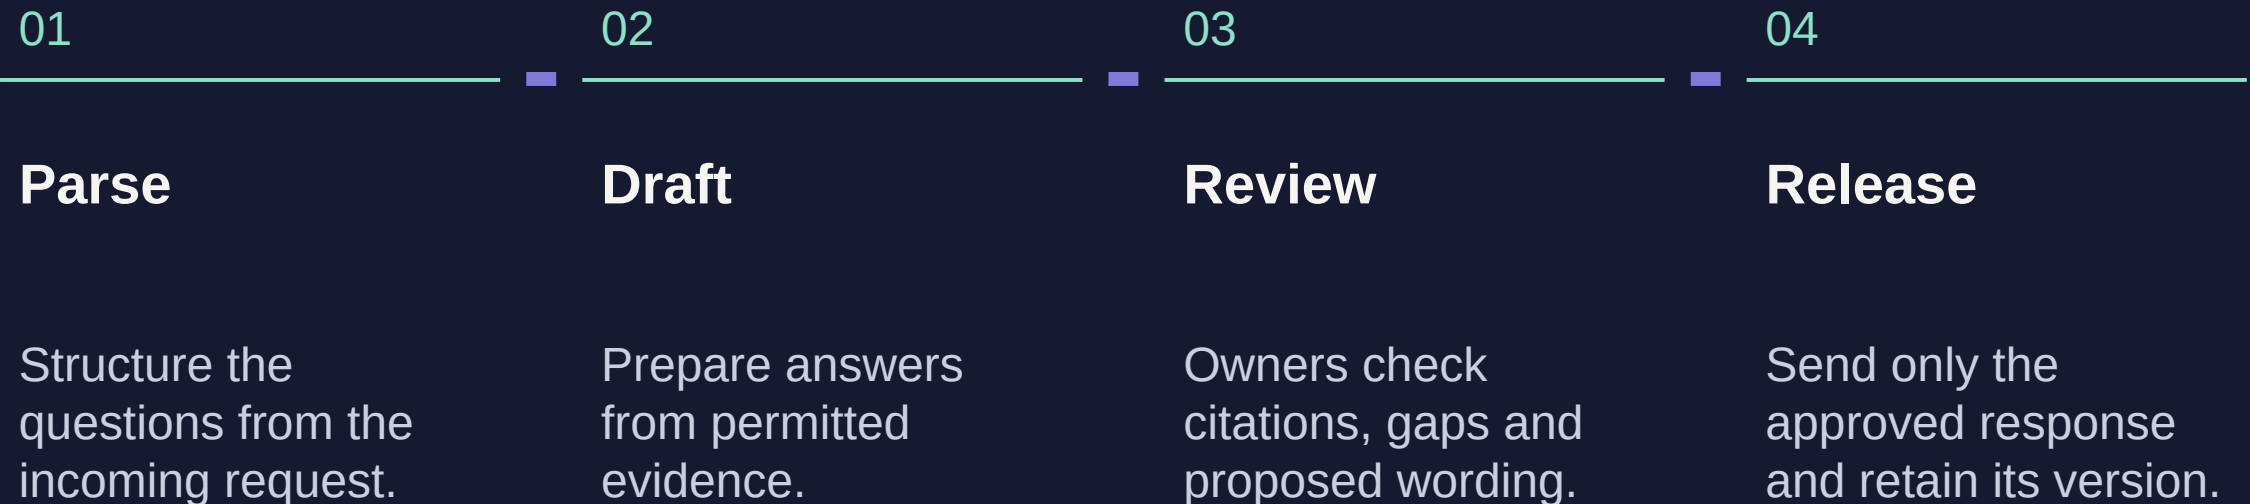

Assign gaps, partial responses and negative answers.

Trust Center synchronization

Keep approved answers aligned with published proof.

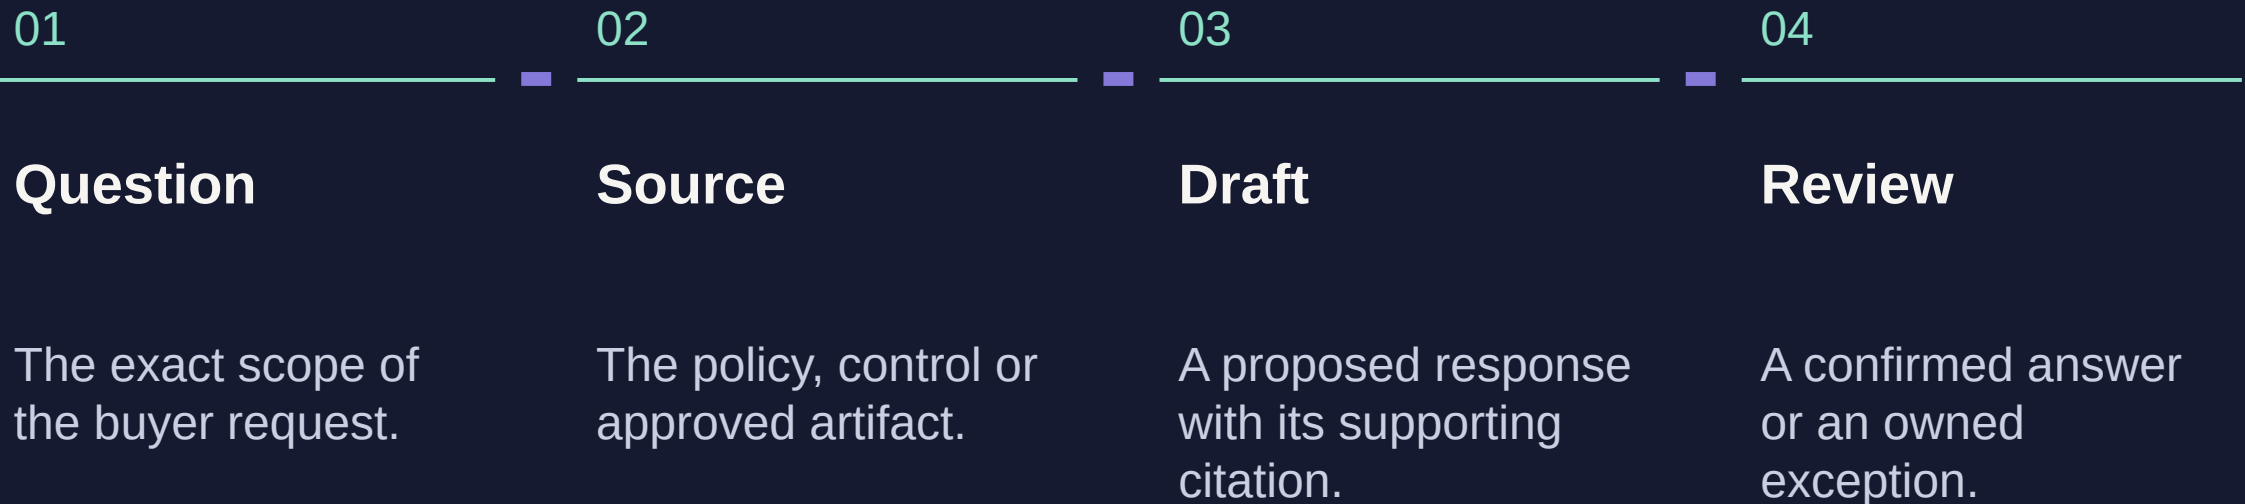

How the work moves

A proposed operating workflow for your evaluation.

Answer quality depends on the supporting evidence

The relationships that make the workflow understandable.

An answer bank entry refers to an old policy

A draft response cites a previously approved answer, but the underlying policy has changed.

Team response

Retrieve the current evidence, revise the answer, and route the affected question to its subject-matter owner for approval.

Decision point

Prior approval does not make an answer current for every new questionnaire.

What changes for your team

The practical value to evaluate against your current process.

Less drafting from a blank page

Evidence-backed suggestions give subject-matter owners a response they can verify and refine.

More consistent customer answers

Approved versions and tracked exceptions help teams explain changes across requests.

Where this module connects

Confirm the interfaces and available data for the intended deployment.

Sources	Questionnaires, policies, live control evidence and approved answers.
Connected modules	Trust Center, Compliance and Cortex.
Working outputs	Reviewed responses, citations and exception records.

What to validate in your evaluation

Use a representative case and agree the acceptance evidence before expansion.

Subject-matter reviewer

Approve factual accuracy and permitted disclosure.

Evidence

Retain the exact source, edits and final approved version.

Measure

Track review turnaround, unanswered questions and citation corrections.

A focused walkthrough Questionnaire Automation

Bring a representative workflow, its source records and the people who own the decision.

Starting point

An answer bank entry refers to an old policy
